"Shower Better" - Use Less Water Without Sacrificing

Shower better—not shorter—with a WaterSense® labeled showerhead, and save as much as 4 gallons of water every time you enjoy a shower!

The Green Team of Mansfield Township is excited to partner with the EPA in promoting WaterSense "Shower Better" Month in October with a showerhead exchange program.

The Green Team is offering one free showerhead per household. Households will have the choice of a hand-held or standard shower head replacement.

You can register for a replacement showerhead starting August 1st until supplies last on a first come, first served basis so sign-up early! Showerheads will be distributed in October.

Once you have signed up here you will be advised when to bring your old showerhead to the Municipal Building to exchange for your new WaterSense showerhead.

This program has been brought to you through a \$2,000 Sustainable Jersey capacity-building grant funded by the PSEG Foundation awarded to Mansfield Township in 2016.

Yes, I am a resident of Mansfield Township and would like a free showerhead._____
